Kit, 40', 60' or 80' Wire Rope

Bin Safe Blind Bolt  
Corrugated Wall Bin Kit, 40',  
60' or 80' Wire Rope

# INSTALLATION

## **DIY Installation**

We have easy to follow installation manuals for all Bin Safe anchor systems. Generally the installation takes 20 minutes. You will need a drill, bits, sockets, and wrenches.

## **Installation Service**

We offer an installation service and for areas outside of our range we will help you connect with a contractor to install the system.

# HOW IT WORKS

1. Put on your harness
  2. Attach your grab rope to the wire
- It's that easy to avoid falls!*

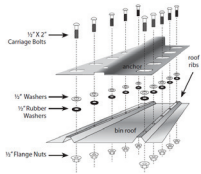

An anchor point is mounted to the top of the bin and the other end is clipped to the bottom of the ladder.

We have engineered 4 different anchors to work with most grain bins.

# THE BENEFITS

Bin Safe is the best solution to prevent falls involving Grain Bins. At Northern Strands we have been working in the fall protection industry since 1970.

Without a fall protection system in place you may be liable for incidents.

Protect your body, workers and wallet by choosing Bin Safe.
